JUNE 2025

CORE FUNCTIONS

MEDLOG Power Projection Common Operating Picture

- Army Preposition Stock Availability
- Combatant Command Support Requirements (Contingency Operations & Training Exercises)
- Theater Lead Agent for Medical Materiel (USAMMCE & USAMMCK)
- Asset Availability
- Strategic Asset Distribution/ Sustainment Readiness Tenets

Business Process and Performance Analysis

- TLAMM Warehouse Management Performance (Turn Around Time, Demand Satisfaction, Demand Accommodation)
- Centralized Program Readiness (% Fill & Shortage Requirements)
- Medical Maintenance Operations Division Performance
- Vendor Support (Aged Due-Ins, Zero-Balance w/ Due-Out, Fill Rates)

Medical Supply and Maintenance Delivery ISO Multi-Compo Role I, II, and III units

- Operational / Theater Demand Planning & Forecasting
- Total Army Readiness Analysis
- CLVIII Distribution Coordination and Tracking
- Medical Equipment support tracking
- Phase Zero Support

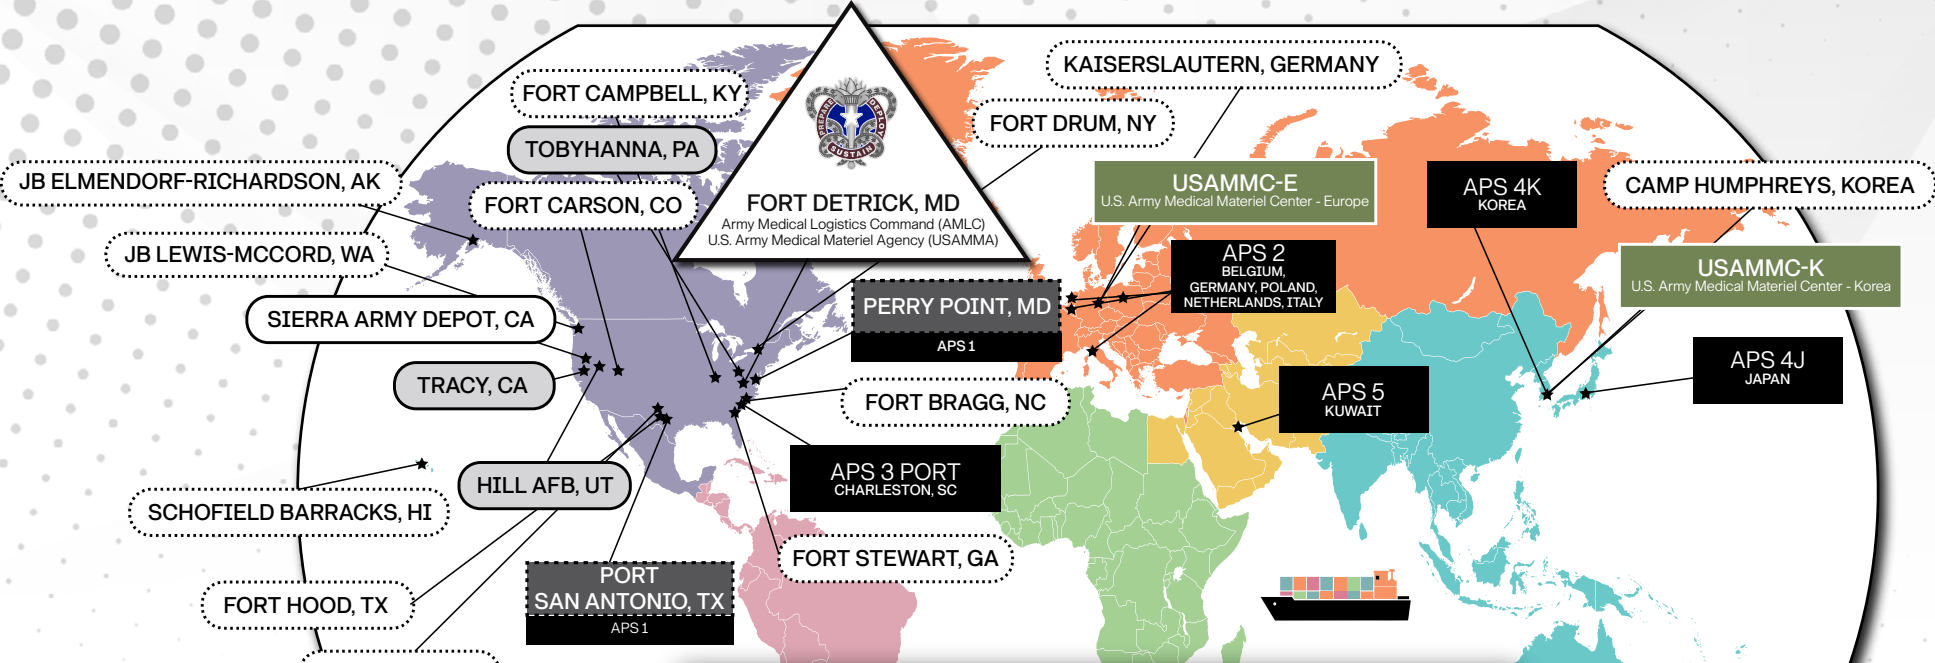

MISSION - Provide operational and strategic level medical logistics support to external organizations, to include all Army components, Joint, Interagency, Intergovernmental and Multinational partners and allies. The SPO team leverages relations across the Joint Logistics Enterprise (JLEnt) to provide class VIII support from industry to the front-line.

VISION - A disciplined, adaptive, and learning organization that synchronizes and integrates medical logistics capabilities at echelon in support of the Army's operating force and joint team—supported at its core by a strong and resilient work force.

U.S. ARMY MEDICAL LOGISTICS COMMAND

SUPPORT OPERATIONS

RESPONSIBILITIES

The AMLC SPO is the principal staff for planning, coordinating, and synchronizing operational and strategic level medical materiel sustainment activities. The SPO is responsible for overseeing distribution management, business operations and facilitating customer support for materiel management, medical maintenance (field and sustainment).

WHAT WE DELIVER

- Review and Analysis of internal business processes and performance to mitigate potential constraints and reduce risk.
- Strategic customer requirements analysis in comparison to available assets residing in the TLAMM or Centralized Programs.
- Combatant Command level depiction of current contingency operations, training exercises and available theater assets.

Strategic Readiness Directorate

Mission: Ensures the delivery of medical logistic support to the Combatant Commands in support of exercises, competition and crisis

Integrates geographically aligned desk officers and analysts to oversee the readiness of mission critical centralized programs in support of the warfighter. Synchronizes the support of nine globally dispersed Army Prepositioned Stock, contingency programs, and unit deployment readiness across the five continents, while nesting AMLC's strategic-level posture within multiple campaign and contingency plans.

Combatant Command Regional Support Desk Officer Coverage:

- EUCOM / AFRICOM
- CENTCOM / APS-3
- NORTHCOM / SOUTHCOM
- INDOPACOM

Materiel Readiness Directorate

Mission: Provides consistent evaluation of the Army's Centralized and Contingency Programs Medical Materiel Readiness through data analysis and quality assurance assessments for the deployment capability.

Coordinates, synchronizes and projects readiness of strategic level CL VIII materiel, medical equipment maintenance, optical fabrication and logistical support for exercises and real-world missions through various capabilities such as Army Pre-positioned Stocks (APS), Medical Materiel Readiness Program (MMRP), Unit Deployment Packages (UDP) Programs and Theatre Lead Army Medical Materiel (TLAMM) centers Europe and Korea.

Providing medical materiel readiness that enables combat power
