U.S. ARMY

MEDICAL MAINTENANCE MANAGEMENT DIRECTORATE

U.S. ARMY MEDICAL LOGISTICS COMMAND

CAPABILITIES

Sustainment-level medical maintenance operations

Medical maintenance for centrally managed programs and expert-level repair support in operational environments

Recapitalize medical equipment

Calibrate Medical Special Purpose-Test, Measuremen and Diagnostic Equipment

The Medical Maintenance Management Directorate (M3D) serves as the Army's enterprise lead for medical maintenance, acting as the central integrator of logistics, maintenance and technology functions for the Joint Force.

By aligning policy, strategic process improvements and advanced technologies, M3D ensures critical medical devices remain mission-capable across the force.

Through direct coordination with strategic partners, the directorate delivers comprehensive depot-level overhaul, precision testing, modification and technical assistance to rapidly return ready medical equipment to the field.

Medical Maintenance Management Directorate provides premier medical maintenance experts and sustainment-level maintenance capability for medical device readiness in support of the Joint Force.

MAINTENANCE OPERATIONS CENTER-MEDICAL (MOC-M)

Serves as the Army's central coordination hub for medical maintenance, providing critical analysis, workload direction and regulatory compliance guidance to support AMLC activities.

MEDICAL MAINTENANCE OPERATIONS DIVISIONS (MMODs)

By extending the operational lifecycle of critical medical equipment and offering remote troubleshooting to units worldwide, MMODs preserve military medical readiness while significantly reducing the need for costly replacements.

MMOD-UT

Hill Air Force Base, UT
Pulmonary equipment, anesthesia equipment and oxygen concentrating equipment

MMOD-CA

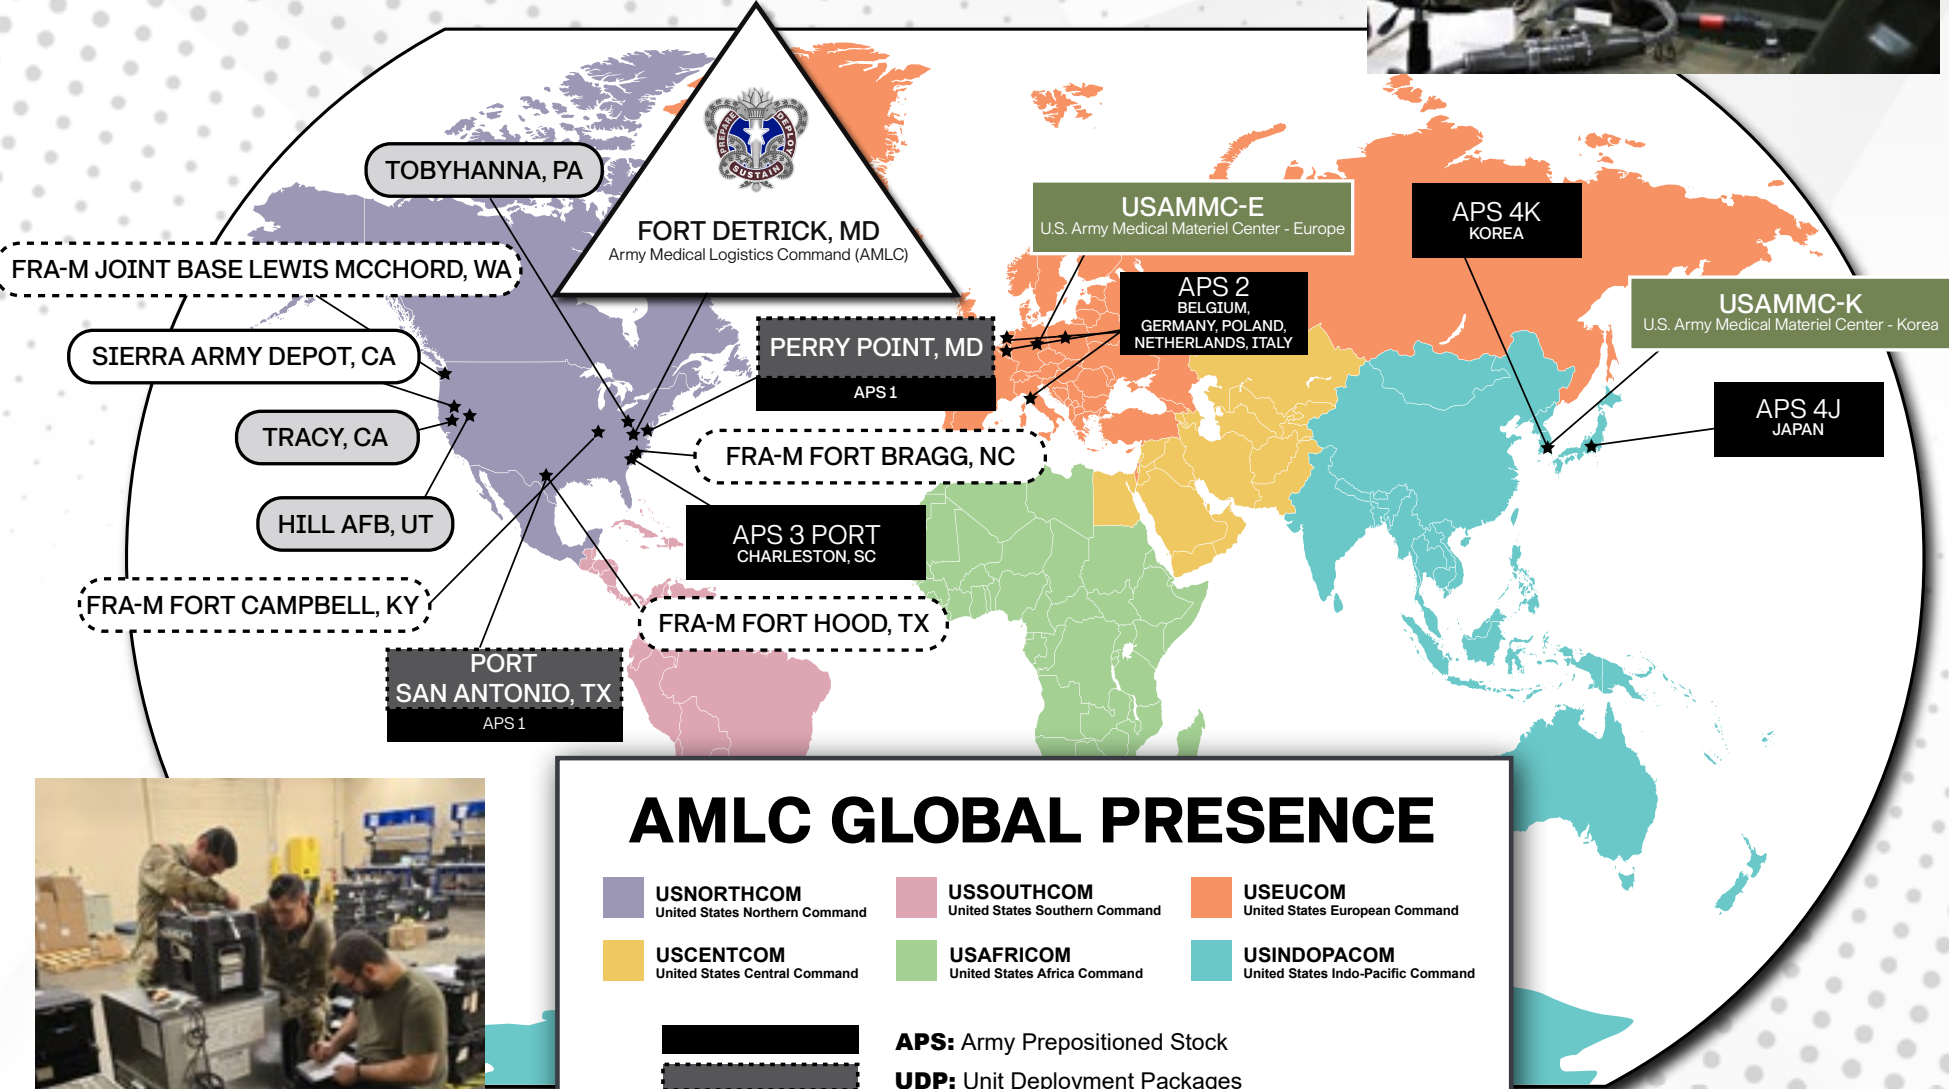

Defense Distribution Depot Tracy, CA
Medical imaging equipment and Medical Special Purpose-Test, Measurement & Diagnostic Equipment (SP-TMDE)

MMOD-PA

Tobyhanna Army Depot, PA
Clinical (field) lab equipment, optical, dental and sterilization

FORWARD REPAIR ACTIVITY-MEDICAL (FRA-M)

Delivers regional, mobile and highly responsive frontline support to ensure medical equipment remains mission-ready for the warfighter.
