
CAPABILITIES
- Acquisition, storage and distribution of medical materiel
- Medical maintenance
- Optical fabrication
USAMMC-E serves as the Theater Lead Agent for Medical Materiel for the U.S. European Command (EUCOM) and U.S. Africa Command (AFRICOM).

USAMMC-E also provides material support for the U.S. Central Command (CENTCOM), which covers operations from northeastern Africa to south-western and south central Asia. Working in collaboration with the 21st Theater Sustainment Command, USAMMC-E supports more than 1,200 Army, Navy, Air Force, and Department of State hospitals, clinics, embassies, and field units.

USAMMC-E maintains a warehouse inventory of more than 6,040 different items and a catalog of more than 45,000 different items. In recent years, USAMMC-E has received annual requests for Class VIII materiel valued up to $173 million. USAMMC-E also typically fabricates more than 60,000 optical pieces per year and receives more than 4,000 orders for medical equipment maintenance annually.

As the theater-level MEDLOG, USAMMC-E provides many of the services performed by civilian medical equipment distribution centers in the United States.

The theater-level MEDLOG is the provider of logistics, training, and innovation in medical materiel. As the designated theater-level MEDLOG, USAMMC-E serves as the single point of contact for medical logistics planning in the EUCOM and AFRICOM theaters and for Class VIII materiel movement into the CENTCOM, including customers currently serving in Iraq and Afghanistan. It primarily provides capabilities in the acquisition, storage, and distribution of medical materiel, optical fabrication, and medical equipment maintenance.

USAMMC-E also develops business improvements to better serve the needs of customers, such as advanced information management and logistics systems for medical materiel supply chain management and medical product requisitions.

The USAMMC-E team includes approximately 285 personnel, including military, civilians, contractors, and foreign nationals.
