<b>MMRP:</b> Medical Materiel Readiness Program
<b>TLAMM:</b> Theater Lead Agent for Medical Materiel
<b>LAP:</b> Logistics Assistance Program

## Mission Execution

USAMMC-K stands ready to “Fight Tonight” alongside our Korean allies to defeat aggression on the Korean peninsula. In addition to serving the Army, USAMMC-K also provides medical logistics support to joint forces and the U.S. Department of State.

USAMMC-K manages two centrally funded programs, including the medical chemical defense materiel (MCDM) and pandemic influenza (PI) stocks. USAMMC-K contributes to Eighth Army’s medical readiness by managing and fielding countermeasures used in the protection and treatment of Soldiers in the event of a chemical, biological, radiological, or nuclear attack. These counter measures include pretreatment, treatment, antidotes skin decontamination and Potency and Dated (P&D) items for the Medical Equipment Set, Chemical Agent Patient Treatment. PI stocks managed by USAMMC-K are centrally funded assets by the Assistant Secretary of Defense (Health Affairs) and are intended to respond to a pandemic or other public health emergencies.

The USAMMC-K team includes approximately 90 people, including U.S. and Republic of Korea military, local Korean civilians, and Department of the Army Civilians.
