

# VaxiCool Container

The power input panel has three different plugs: Conventional AC power, solar panel and 12 VDC current.

Battery box containing 2 - 12 Volt/14 Amp Gel-Cell batteries.

The system is comprised of :

- ( a ) A super-efficient compressor.
- ( b ) A super insulated container using VacuPanel insulation designed to maintain vaccines at appropriate temperatures temperatures 2-8 Degrees Celsius.

The VaxiCool has an inside dimension of 14" (length) by 10-1/2" (width) by 10" (depth).
